Low Impact
Development

October 18, 2005

LID Principles, Techniques, & Implementation Strategies

Timothy Reardon, Regional Planner
Metropolitan Area Planning Council

Timothy will present LID principles, techniques, and implementation strategies. Timothy led MAPC's efforts to prepare the Massachusetts Low Impact Development Toolkit, a set of materials designed to assist planners, developers, and property owners with the implementation of LID.

LID Regulatory Implementation on a Local Level

Angus Jennings, Principal Planner
Concord Square Development Company, Inc.
Former Town Planner for the Town of Marshfield

Angus will discuss his participation in recommending stormwater BMPs for the Town of Marshfield, constructing a bioretention basin, and producing a stormwater model bylaw and regulations suitable for other Massachusetts communities.

LID Case Studies throughout Massachusetts and the Country

Steven P. Roy, Board member of the LID Center
Senior Planner-Geosyntec Consultants, Inc.

Steven will present a series of LID implementations in Massachusetts including urban environments based on projects that his company has designed, permitted, and installed. Steven will conclude his presentation with examples from other parts of the country.
