

SCHOOL TO SEA

PRESCHOOL PROGRAMS

CAN'T GET TO THE COAST?

Salem Sound Coastwatch brings the coast to your classroom with interactive, marine science programs led by our educators

\$200 per classroom session*

Marine science programs last one hour. Best for classrooms with 20-25 students. Maximum of 25 students allowed.

*A mileage fee may apply to locations outside a 20 mile radius.

Visit www.salemsound.org (School to Sea page) to request a date.

Watershed Explorers: From Forest to Sea

Splash into the journey of water as it travels from forest to ocean! Preschoolers meet live ocean animals, explore how trash affects marine life, and discover simple ways to protect our watershed.

Learning Themes: Water Pathways, Human Impacts, Ocean Connections

Key Skills: Sensory Exploration, Observation, Curiosity Building

Marvelous Mollusks

Slither, slide, and swirl like a snail! Through sorting shells, playing movement games, and meeting real mollusks, kids discover how these fascinating animals live and thrive in their watery homes.

Learning Themes: Animal Characteristics, Habitats, Movement and Survival

Key Skills: Fine Motor, Classification, Sensory-Motor Play, Observation

Crabs and Coastlines

Scuttle like a crab and explore the shoreline! Through storytelling, games, and building coastal habitats, families discover how tides shape the coast and how crabs adapt to life on the move.

Learning Themes: Habitats, Tides, Adaptations

Key Skills: Gross Motor, Imaginative Play, Observation, Early Science Thinking
